## DIGEST

U.S. Agricultural Exports Rise \$4.1 Billion (see p. 2). U.S. agricultural exports rose 25 percent in value during the first 7 months of fiscal year (FY) 1988 to \$20.9 billion, gaining \$4.1 billion over value for the first 7 months of FY 1987. Export volume rose 22 percent to 91.6 million tons. Bulk products accounted for most of the gain as the U.S. share of world trade grew for the second consecutive year. The U.S. share of world bulk commodity markets expanded as exportable supplies fell for some commodities in competing countries, and U.S. Government export promotion programs boosted exports of other products.

October-April Imports At Record Pace (see p. 6). U.S. agricultural imports in the first 7 months of FY 1988 rose 2 percent over those of the same months of FY 1987 to \$12.6 billion. Imports for FY 1988 are expected to reach a record high of \$21 billion, exceeding the previous record of \$20.9 billion in FY 1986. The decline of the dollar did not produce the higher prices and lower volume expected.

Ranking of Major Agricultural Exporters Changes (see p. 10). The United States, France, the Netherlands, and West Germany remained the top four agricultural exporters during 1979-86. Brazil fell from fourth place in 1983 and 1984 to seventh place in 1986. Argentina fell from 9th place in 1980-84 to 14th place in 1986. Although the United States has remained the top agricultural exporter, its world market share fell from 16.8 percent in 1983-85 to 12.4 percent in 1986.

U.S. Agricultural Exports Under CCC Export Credit Guarantee Programs Increase (see p. 16). U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation in FY 1987 totaled about \$2.7 billion, up almost 15 percent from FY 1986. This was the first increase in exports under these programs after 4 years of decline. Chief commodities exported under CCC programs were wheat, corn, and soybeans. Top destinations for these exports were Mexico, Iraq, and Korea.

Appendix Tables (see p. A-1). In this issue, detailed statistical tables relating to text articles have been moved to an appendix section beginning on p. A-1. Commodity export tables begin on p. A-2, and import tables begin on p. B-1. Tables containing data on foreign currency exchange units for selected countries and commodity prices begin on p. C-1.

Principal coordinators were Thomas A. Warden and Mary L. Fant. Denise Morton provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics System Branch, Data Services Center.

## U.S. AGRICULTURAL EXPORTS RISE \$4.1 BILLION

U.S. agricultural exports rose 25 percent in value during the first 7 months of fiscal year (FY) 1988 (October 1987-April 1988) to \$20.9 billion, a \$4.1 billion gain over value for the first 7 months of FY 1987. Bulk products accounted for most of the gain as the U.S. share of world trade grew for the second consecutive year. The U.S. share of world bulk commodity markets expanded as exportable supplies fell for some commodities in competing countries, and U.S. Government export promotion programs boosted exports of other products. Agricultural export volume rose 22 percent to 91.6 million tons. The volume of wheat exports rose 89 percent, largely because of the Export Enhancement Program (EEP), while export volume for corn, soybeans, and cotton rose 13 percent, 8 percent, and 16 percent.

Export value and volume increased more for wheat than for any other commodity. Wheat export value rose \$1 billion to \$2.4 billion, a 76-percent gain over that of the same period in FY 1987. Export volume rose 11 million tons, accounting for most of the 17-million-ton increase in total export volume. Much of the increase stemmed from renewed U.S. exports to the U.S.S.R., following a smaller, lower quality Soviet crop. No U.S. wheat was exported to the U.S.S.R. in the first 7 months of FY 1987, but in the same period of FY 1988, the EEP boosted wheat exports to 7 million tons. The EEP also helped revive wheat exports to China, where export volume jumped from nothing in FY 1987 to 2.7 million tons in the first 7 months of FY 1988.

U.S. corn exports rose 3 million tons to 25.3 million tons, as reduced supplies in competing countries helped boost U.S. market share. Shipments to Japan, the largest U.S. market, rose more than 1.4 million tons as China's exports slowed. Reduced Chinese exports and increased Korean consumption boosted U.S. corn exports to Korea by 700,000 tons.

Corn exports to Spain and Portugal rose 1 million tons as the Compensation Agreement between the United States and the European Community (EC) reopened these markets to the United States. Spain and Portugal historically have been important U.S. markets; however, variable levies and other administrative barriers associated with their accession to the EC in 1986 reduced U.S. sales to Spain and Portugal. Subsequent negotiations partially reopened these markets to non-EC exporters, including the United States. However, U.S. exports to other EC customers fell, largely offsetting gains to Spain and Portugal. With lower exports to Belgium and the Netherlands, U.S. corn exports to the EC rose only 280,000 tons, a 19-percent gain over those of the first 7 months of FY 1987.

Soybean exports rose 1.2 million tons to 16 million tons. This 8-percent gain combined with a 15-percent price increase to raise the U.S. soybean export value \$700 million, the second largest commodity increase. Growing sales to the EC raised U.S. soybean export volume, as did large purchases by the U.S.S.R.

### High-Value Exports Continue Growing

High-value exports during the first 7 months of FY 1988 surpassed those of the same period of FY 1987 by 10 percent, or \$670 million. U.S. shipments of most

products rose, including poultry meat, hides, fruits, nuts, and vegetables. However, Mexico purchased a substantially smaller amount of dried beans compared with earlier years, and pulse exports were \$70 million lower as a result.

Horticultural product exports rose 11 percent, or \$227 million, to \$2.3 billion, despite the drop in pulse exports. Nut export value rose as the volume of almond exports to the EC tripled, more than offsetting a 34-percent price decline. While price changes for fruit exports were mixed, export volume was higher for fresh citrus, fresh noncitrus, dried, canned, and frozen fruits. Vegetable exports were similarly boosted by larger shipments of fresh, frozen, and canned products.

Animal product export value rose nearly \$400 million, reaching \$3.3 billion. Exports to Japan rose more than \$100 million because of growing sales of beef, pork, and cattle hides. Cattle hides also added \$100 million in exports to Korea. (Stephen MacDonald, Commodity and Trade Analysis Branch)

## OCTOBER-APRIL IMPORTS AT RECORD PACE

U.S. agricultural imports in the first 7 months of fiscal year (FY) 1988 (October 1987-April 1988) rose 2 percent over those of the same months of FY 1987 to \$12.6 billion. Imports for FY 1988 are expected to reach a record high of \$21 billion, exceeding the previous record of \$20.9 billion in FY 1986. 1/ The decline of the dollar did not produce the higher prices and lower volume expected.

Competitive imports continued their upward trend into 1988. Competitive imports in March 1988 reached a record high of \$1.34 billion, due primarily to high import levels of fruit, vegetables, and beef. Imports of cocoa, rubber, beef, live cattle, fresh fruits and vegetables, malt beverages, and vegetable oils caused most of the change from imports in the same period of FY 1987.

### Noncompetitive Imports Stagnate

Coffee imports in the first 7 months of FY 1988 fell 22 percent in value from those of the same period in FY 1987, although volume remained about the same. Two previous 1.5-million-bag reductions in the global export quota by the International Coffee Organization (ICO) forced the price of coffee above \$1.20 per pound in late February. However, prospects for a bumper 1987/88 harvest in Brazil offset most of the gains from the quota cuts. At the regularly scheduled ICO council meeting in late April, the United States and the European Community (EC) opposed extending the current International Coffee Agreement scheduled to expire September 1989.

World cocoa production will exceed use in FY 1988 for the fourth consecutive year. The March 1988 International Cocoa Organization (ICCO) estimates put world cocoa production at a record 2.095 million tons (gross weight), 6 percent above the FY 1987 total. In addition to a record cocoa crop, the ICCO was unable to agree on either intervention prices or the operation of the stock withholding scheme, two central issues. These developments pushed down cocoa prices from 90 cents per pound in late January to 75 cents per pound in late April.

Cocoa bean imports in the first 7 months rose 30 percent over the year-earlier level to 195,000 tons. Cocoa bean import value accounted for 54 percent of all cocoa product imports in the first 7 months of FY 1988, compared with 49 percent in the same period of FY 1987. Other noncompetitive import values rising in the 7-month period were rubber, bananas, carpet wool, and essential oils.

### Competitive Imports on Record Pace

Competitive imports, boosted by unusually high shipments of beef, live cattle, fruits, and vegetables, totaled \$8.7 billion, 6 percent above the record high of FY 1987. Imports of these products are expected to set a record in FY 1988 for the fifth consecutive year.

Animal products make up about 35-40 percent of all competitive imports. Live cattle and hogs, boneless beef, casein, cheese, and apparel-grade wool are the most significant categories. In the first 7 months of FY 1988, live cattle imports from Mexico, primarily feeder cattle, were only 3 percent below year-earlier levels when a record 1.2 million head were imported.

---

1/ See U.S. Department of Agriculture, Economic Research Service, Outlook for U.S. Agricultural Exports, May 26, 1988.

November-January are the heaviest months for U.S. feeder cattle imports, with 45 percent of the total for the last 2 fiscal years shipped during these 3 months. U.S. feeder cattle prices rose to a record 85 cents per pound in March, just above the record set in FY 1979. Live hog imports during the first 7 months of FY 1988 reached 330,000 head, 41 percent above year-earlier levels but well below the record pace of 1 million head in FY 1985.

A voluntary restraint agreement signed last fall by the major beef suppliers (Australia, New Zealand, and Canada) to the United States kept the excess beef supply in bonded warehouses before releasing it for general consumption in January and February 1988. Monthly beef imports nearly doubled from 46,000 tons in October-December to 76,000 tons in January-April. October-December is ordinarily the heaviest shipping period. Pork imports for October-April FY 1988 remained fairly close to the record high of 270,000 tons of October-April FY 1987.

U.S. vegetable imports, primarily from Mexico, reached 1.8 million tons by the end of April 1988 compared with 1.7 million tons a year earlier. January-May generally are the peak months for vegetable imports. Tomato imports from Mexico begin in January, followed later by cucumbers, peppers, and eggplant. By the end of May 1987, 70 percent of all fresh vegetables had been imported for the fiscal year.

Unlike many vegetables that are harvested year round in Florida and California, fruit imports, such as grapes and pears from Chile, fill a U.S. production gap in March-June. Based on shipments to date, FY 1988 imports could exceed the \$3.6 billion in fruits, nuts, and vegetables imported in FY 1987.

#### **Dollar Fluctuations Send Mixed Signals**

The U.S. dollar has depreciated during the past 3 years against most major foreign currencies. This development would ordinarily raise import prices and lower import quantities. Import value generally falls when the dollar falls and rises when the dollar rises.

Agricultural import prices began to rise late last fall, but quantities have not dropped significantly:

#### Quarterly indexes of U.S. agricultural imports

<u>Year and quarter</u>	<u>Price</u>	<u>Quantity</u>
		<u>(1977=100)</u>
1986:		
I	114.9	147.8
II	117.2	138.7
III	111.2	136.0
IV	114.7	135.3
1987:		
I	110.0	145.6
II	107.5	148.0
III	110.8	132.0
IV	115.2	137.0
1988:		
I	118.5	145.0

One reason for this apparent contradiction may be that the dollar has appreciated rather than depreciated against the currency of many of the large suppliers. The Mexican peso is a good example because Mexico was the second largest agricultural supplier in FY 1987. In April 1987, one Mexican feeder steer shipped from Chihuahua to Texas sold for 285,000 pesos. At an exchange rate of 1,141 pesos per U.S. dollar, the cost of this steer was \$250. In April 1988, a steer selling for 285,000 pesos cost the U.S. importer only \$125. Even if the 90-percent inflation rate was included, the Mexican exporter would only charge 540,000 pesos, or \$238. This situation has encouraged demand for Mexican cattle and other products. (Stephen R. Milmoe, Commodity and Trade Analysis Branch)

1/ Customs value basis.2/ Preliminary.

## RANKING OF MAJOR AGRICULTURAL EXPORTERS CHANGES

The United States, France, the Netherlands, and West Germany remained the top four agricultural exporters during 1979-86. Brazil fell from fourth place in 1983 and 1984 to seventh place in 1986. Argentina fell from 9th place in 1980-84 to 14th place in 1986. Although the United States has remained the top agricultural exporter, its world market share fell from 16.8 percent in 1983-85 to 12.4 percent in 1986.

Despite stability in the ranking of the world's 10 leading agricultural exporters, supply and price changes for particular commodities and countries and slowing world import demand have changed the importance of the major exporters. For example, falling export values for coffee and soybean products largely caused Brazil's fall from fourth largest exporter in 1983-84 to seventh place (behind the United Kingdom and West Germany) in 1986. Declining values for grain and soybean exports caused Argentina's fall from 9th place (ahead of Belgium-Luxembourg and Italy) in 1980-84 to 14th place in 1986.

The United Kingdom rose from eighth place (behind Australia and Canada) in 1984 to fifth place (behind West Germany) in 1986, primarily on the strength of increased grain exports to other European Community (EC) countries (intra-EC trade). Lower value and volume of grain exports caused Canada to fall from 7th to 10th place between 1985 and 1986.

Although the United States has retained its position as the world's leading agricultural exporter during the past 8 years, it has yielded some of its dominant world market share to the EC countries of France, the Netherlands, West Germany, the United Kingdom, Belgium-Luxembourg, and Italy. These countries increased their combined market share from an average of 28 percent in 1979-80 to 33.1 percent in 1986. Only the United States outranked these countries individually in 1986 as the largest agricultural exporter.

### Export Shares of Major Exporters

The United States increased its market share from 18.1 percent in 1979-80 to 18.6 percent in 1981-82, primarily because of increased export volume of grain and soybeans. However, the U.S. market share of world agricultural exports fell to 16.8 percent in 1983-85 and to 12.4 percent in 1986, the lowest market share since 1970-72, because of falling export volume and prices of grains and soybeans. The market shares of France, the Netherlands, and West Germany, the second, third, and fourth leading agricultural exporters, increased during this period. Their combined market share increased from 19.2 percent in 1979-80 to 23 percent in 1986.

As a trading bloc, the EC, excluding Spain and Portugal, was the world's largest agricultural exporter in 1986, with \$77.9 billion in exports. Excluding intra-EC trade, the EC was the second largest agricultural exporting region, with \$25.8 billion in exports in 1985-86. Agricultural export value and world market share for the EC increased between 1981 and 1985-86. For example, in 1980-81, EC agricultural export value averaged \$74.8 billion and represented 32.1 percent of world agricultural exports. In 1985-86, the EC's agricultural export value was \$77.9 billion and represented 35.8 percent of world agricultural trade. The increase in EC export value was concentrated primarily in intra-EC trade because EC trade with non-EC countries decreased slightly from \$27.7 billion in 1980-81 to \$27.3 billion in 1986. On the other hand, intra-EC trade increased from \$46.7 billion in 1980-81 to \$52.2 billion in 1985-86.

### Major Wheat and Wheat Flour Exporters

The 12 leading exporters of wheat and wheat flour (in wheat equivalents) accounted for about 95 percent of world export volume for these commodities in 1979-86. The top five exporters (the United States, Canada, France, Australia, and Argentina) accounted for 85 percent of the volume in 1979-85 and 82 percent in 1986. The United States accounted for almost 40 percent of the world export volume for wheat and wheat flour in 1979-80 and about 41 percent in 1981-82 (U.S. exports increased to 45.1 million tons in 1981). U.S. wheat and wheat flour exports fell to 33.2 percent in 1983-85. U.S. exports fell from 43.6 million tons in 1984 to 26.5 million tons in 1986, drastically reducing the U.S. share of the world market by 9.8 percentage points to a 15-year low of 27.7 percent in 1986.

### Major Corn Exporters

The 12 leading corn exporters in 1979-86 accounted for 96-98 percent of world corn export volume. The top five countries (the United States, Argentina, France, Thailand, and South Africa) accounted for 94.5 percent of world corn export volume in 1979-80 and 91.8 percent in 1981-82. The top five exporters changed in 1983-86 as drought in South Africa drastically cut production and exports during this period.

Belgium-Luxembourg replaced South Africa as the fifth leading exporter in 1983-84. China surpassed Belgium-Luxembourg in 1985-86 with exports of nearly 6 million tons of corn, up from an annual average of 100,000 tons in 1980-83 and 900,000 tons in 1984. The rapid expansion in corn exports made China the third leading corn exporter in 1985 (behind the United States and Argentina) and the fourth leading corn exporter in 1986 (behind the United States, Argentina, and France).

The U.S. share of world corn exports was 78 percent in 1979-80 and about 68 percent in 1981-85 but only 47.1 percent in 1986. The other top exporters in 1984 (Argentina, France, Thailand, and Belgium-Luxembourg) and in 1985 (Argentina, China, France, and Thailand) increased their market shares during these periods of falling world demand. Exports from these countries, except from Belgium-Luxembourg, rebounded sharply in 1986.

### Major Soybean Exporters

The five leading soybean exporters (the United States, Argentina, Brazil, China, and Paraguay) accounted for about 98-99 percent of world soybean exports in 1979-86. The United States, the world's leading soybean exporter, accounted for 81.5 percent of soybean export volume in 1979-80 and 86 percent in 1981-82. But the U.S. share of world soybean exports fell to 75.9 percent in 1983-85, rebounding slightly in 1986 to 77.5 percent. Paraguay and China increased their market shares of world soybean exports in 1979-86. Argentina's and Brazil's combined market share rose from 10.9 percent in 1981-82 to 17.8 percent in 1983-85 but fell to 13.7 percent in 1986. (Arthur Mackie, Agricultural and Trade Indicators Branch, Agriculture and Trade Analysis Division)

## U.S. AGRICULTURAL EXPORTS UNDER CCC EXPORT CREDIT GUARANTEE PROGRAMS INCREASE

U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation (CCC) increased almost 15 percent in fiscal year (FY) 1987 to slightly more than \$2.7 billion. This increase marks the end of a FY 1983-86 decline. Exports under these programs accounted for 10 percent of all U.S. agricultural export value.

The CCC programs consist of the Export Credit Guarantee Program (also known as GSM-102) and the Intermediate Export Credit Guarantee Program (GSM-103). They assist U.S. agricultural exports by facilitating the private, commercial credit extended to foreign importers for the purchase of designated American agricultural commodities. Under GSM-102, the CCC guarantees repayment of private credit extended for up to 3 years, while GSM-103 covers credit extended for 3-10 years.

GSM-102 has operated since FY 1981, and the Food Security Act of 1985 authorized GSM-103, which has operated since FY 1986. In FY 1987, importers in 26 countries participated in at least 1 of the 2 programs, which involved 35 commodities. Sales under GSM-102 totaled almost \$2.6 billion, while those under GSM-103 accounted for about \$150 million. These figures exclude lumber, leather, and wood pulp exports, which technically are not considered agricultural exports.

Several major importers of American agricultural commodities participated under the programs. Mexico was the largest destination, accounting for more than 25 percent of U.S. agricultural exports under these CCC programs. Importers there purchased nearly \$735 million of agricultural goods, mostly corn and soybeans, under GSM-102. Iraq was the second largest recipient of exports under these programs, importing slightly more than \$550 million of agricultural goods. Of this, more than 5 percent was under GSM-103. Iraqi purchases accounted for 20 percent of total U.S. exports under CCC export credit programs, and rice, wheat, and corn were major commodities. Korea imported the third largest amount, accounting for almost 20 percent of the agricultural exports under these programs. Korea imported almost \$512 million of agricultural products, mostly cotton and wheat, under GSM-102.

These programs also played a significant role in the exports of specific U.S. agricultural commodities. Wheat was the top commodity shipped under both CCC programs, with shipments of more than \$715 million, which accounted for about 25 percent of the export value of U.S. wheat shipped in FY 1987. Top destinations for wheat shipped under CCC programs were Korea, Morocco, and Algeria. Several importers purchased wheat under these programs in conjunction with the Export Enhancement Program.

Corn exports under GSM-102 amounted to about \$480 million, accounting for about 15 percent of FY 1987 corn exports. Mexico purchased more than half of the corn shipped under this program. No corn was exported under GSM-103.

Soybeans, at \$325 million, were the third largest commodity shipped under GSM-102; none were shipped under GSM-103. These programs accounted for less than 10 percent of U.S. soybean export value. Mexico accounted for about two-thirds of GSM-102 soybean shipments. (Mark E. Smith and Fannye G. Lockley, Commodity and Trade Analysis Branch)

INDEX OF  
APPENDIX TABLES

<u>Table</u>	<u>Exports</u>	<u>Page</u>
A-1	U.S. agricultural exports: Quantity and value by commodity . . . . .	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country October-April 1986/87 and 1987/88, and April 1988 . . . . .	A-4
A-3	U.S. wheat exports: Quantity by destination, October-April 1986/87 and 1987/88 . . . . .	A-65
A-4	U.S. coarse grain exports: Quantity by destination, October-April 1986/87 and 1987/88 . . . . .	A-66
A-5	U.S. soybean exports: Quantity by destination, October-April 1986/87 and 1987/88 . . . . .	A-67
A-6	U.S. agricultural exports: Value by destination, October-April 1986/87 and 1987/88 . . . . .	A-68
 <u>Imports</u> 		
B-1	U.S. agricultural imports: Value by country of origin, October-April 1986/87 and 1987/88, and April 1987 and 1988 . . . . .	B-2
B-2	U.S. agricultural imports: Quantity and value by commodity . . . . .	B-3
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-April 1986/87 and 1987/88, and April 1988 . . . . .	B-5
 <u>Prices</u> 		
C-1	Foreign currency units per U.S. dollar. . . . .	C-1
C-2	Domestic and foreign wheat prices . . . . .	C-2
C-3	Corn, sorghum, rice, and cotton prices. . . . .	C-2
C-4	U.S. and Northern European soybean and product prices. . . . .	C-3
C-5	U.S. import prices. . . . .	C-3
